

Eldon Taylor's Seminars and Presentations

Dr. Eldon Taylor is a New York Times bestselling author and he considered to be an expert in the area of non-conscious processing. He has served as an expert witness with regards to both hypnosis and subliminal communication. Eldon is a Fellow in the American Psychotherapy Association so his approach is both scientific and pragmatic. He believes that as Carl Jung once said, "Until you make the unconscious conscious it will direct your life and you will call it fate!" Eldon's work educates individuals through self-discovery and thereby provides them with valuable tools on their journey to self-empowerment.

Eldon's workshops are packed with exciting audio/video. He has mesmerized audiences with simple tools that manipulate their choices, and then he has shown them how this is done. He has electrified sales organizations with the tools it takes to be a top producer. He has worked with elite athletes and entire teams helping them win gold medals and even championships. In one study, his training programs aided professional golfers to substantially increase their incomes during the period of the study.

Eldon's work has been independently researched and repeatedly demonstrated effective in the most rigorous of scientific studies, the double blind. As the host of the syndicated radio show, Provocative Enlightenment, he has interviewed hundreds of motivational leaders. He offers a novel and hard hitting approach to those formally soft questions that everyone is interested in, such as Who am I? What does it all mean? How do I maximize my life experience?

Eldon is the author of more than 300 motivational books and audio video programs. He has lectured to packed audiences throughout the world and has had his material translated into dozens of languages. Whether you want a speaker to motivate your organization to perform at their peak, or unpack the mind-body connection for optimal wellness and well-being, Eldon is your sure choice.
