

Refuting the Scientific View of the Irrationality of Faith

It is not what a book says that matters, but rather what it does. *Questioning Spirituality* is not about proving or disproving the presence of a divine power, but only about the rationality of believing that such a thing could exist. The beauty of this book is that it delivers—opening doors that many believe should be kept tightly closed.

“[Taylor] makes a compelling case that the scientific worldview—one that sees humans as “meat machines” —is inconsistent with people’s experiences of themselves and is not nearly as rationally superior as it is so often presented. This alone makes the author’s compact consideration a worthwhile read.”

A philosophically astute challenge to the rational supremacy of science over its spiritual rivals.”

~ Kirkus Reviews

Today’s reliance on science has forced most to discard ideas of faith, spirituality, and religion. If believing in a higher power is irrational, as stated so eloquently and emphatically by the likes of Sam Harris, Daniel Dennett, and Richard Dawkins, then believers are automatically cast into the category of the uneducated, and uninformed. *Questioning Spirituality* tips these ideas upside down and allows the truth to emerge, bringing with it a whole new sense of freedom.

“A thought-provoking investigation of the assumed irrationality of spiritual beliefs that honors both sides of the debate.

In a world where science and religion are often seen as antithetical to one another, Dr. Eldon Taylor dares to question whether religion is as irrational as some anti-religion advocates would have people believe.

The result is a surprisingly direct and pragmatic conversation that handles peoples’ experiences as they relate to their beliefs with respect. When belief in a higher power is taken as seriously as the scientific worldview, does religion appear as irrational as is commonly believed, or is the alleged rational superiority of the scientific worldview unjustified?”

~ Timothy Thomas: Independent Book Review

Atheists can no longer hold onto the claim that their arguments against God are water-tight or infallible, and that theirs is the only sensible way to live. Using the fundamentals of science and philosophy, Eldon Taylor shows that not only is it rational to believe in a God or Higher Power, but that it is the smarter option.

Talking Points

- Why has atheism doubled among Gen Z?
- Overall, U.S. adults with college degrees are less religious than others—why?
- How does science come into conflict with religion and spirituality?
- How is the scientific belief in atheism irrational?
- Atheism and agnosticism are unnatural and must be taught before they are believed—why?
- What do white crows teach us about the rationality of spirituality?
- What is the difference between theoretical reasoning and practical reasoning?
- What are some of the advantages gained as a result of holding a spiritual belief?

“**Questioning Spirituality**’s method of analysis offers the opportunity to consider (or reconsider) the foundations which can support or deny religious convictions.

Bigger-picture thinking about the diverse issues involved in defining the spiritual domain and the rationality of its possibilities.”

~ **D. Donovan, Senior Reviewer, Midwest Book Review**

About the Author

Dr. Eldon Taylor is a *mind power* expert and a New York Times best-selling author. He has written 14 books and created over 500 audio and video personal motivation programs. His earlier best-selling books include:

- *Choices and Illusions: How Did I Get Where I Am and How Do I Get Where I Want To Be;*
- *I Believe: When What You Believe Matters;*
- *Mind Programming: From Persuasion and Brainwashing, to Self-Help and Practical Metaphysics;*
- *What Does That Mean? Exploring Mind, Meaning and Mysteries; and*
- *What If? The Challenge of Self-Realization.*

For 15 years, Eldon hosted the popular radio show *Provocative Enlightenment*. He is also the inventor of the patented InnerTalk technology, and founder of Progressive Awareness Research, Inc. Eldon has appeared on numerous television and radio shows, is a regular guest expert on **Coast to Coast AM with George Noory**, and lectures around the world.
